Instructions for using EcoCat: the Ecosystems Report Catalogue

To search Ecocat for reports and project data:

1) Go to: http://www.env.gov.bc.ca/ecocat/ and launch the application,
2) Search for the project using key words on the Search page, or
3) Use the Advanced Search:
   - Under the first heading, "Report Type" choose "Terrestrial Information" from the drop-down list.
   - Scroll down the page to "Terrestrial Information" and choose TEM, PEM, SEI or WHR (or another subject area of interest) from the drop-down list.
   - Click on the "Search" button at the bottom of the page.

   To refine your search further, try selecting additional criteria such as:
   - Region
   - Biogeoclimatic Zone
   - Species
   - Additional or other Keywords (try map sheet number; geographic location, etc)

The level of catalogue detail varies between projects.

Additional Information:

Most **original** project data and/or reports for TEM, PEM, & SEI projects, Wildlife Interpretations and a limited number of Terrain Stability Mapping projects are available from the Ecological Reports Catalogue (EcoCat). Note that the GIS data may have undergone cleanup and conversion and may now also be available in GIS file geodatabase format, upon request.:

> Requests for TEM, PEM, or SEI project information should be directed to eco_mail@Victoria1.gov.bc.ca
>
> Requests for Terrain or Soils project information should be directed to Soilterrain@victoria1.gov.bc.ca
>
> Requests for Wildlife Habitat Ratings and Species Distribution mapping should be directed to whr_mail@victoria1.gov.bc.ca

A web-based interactive mapping application (iMapBC) can also be used to locate TEM, PEM, SEI, Terrain (Terrain inventory, terrain stability mapping, bioterrain) and Soils mapping projects. See: http:\\www.env.gov.bc.ca\tei\access_tei.html#GISData
