Please be aware of the Community Watershed. It is important to know that activities such as swimming, recreating, dumping and littering, unleashed dog walking, and illegally driving motorized vehicles here can cause microbial and chemical contamination of this important water source.

You can mitigate your impact by:
- Collecting and disposing of garbage properly
- Using proper washroom facilities
- Always stay on designated trails
- Stay away from sensitive areas susceptible to rutting and erosion
- Avoid riding during muddy conditions
- Following above rules

Thank you for your part in protecting this valuable community resource.
