APPROVALS

KAMLOOPS GOAL 2 PROTECTED AREAS MANAGEMENT DIRECTION STATEMENTS - GOAL 2 BINDER APPROVALS PAGE

Forward

This binder contains 32 management direction statements developed under the direction of the Kamloops Land and Resource Plan Implementation Table and BC Parks. The government designated these protected areas in May, 1996. The 32 management direction statements provide strategic direction for these protected areas. Protected areas' roles, strategies and objectives will not change extensively over time. Management actions, implemented through operations plans, however, will change as priorities, funding and support resources come available.

Purpose of Management Direction Statements

Management Direction Statements provide strategic management direction for all protected areas that do not have a full management plan. MDS do not negate the need for future, more detailed management plans. Management Direction Statements also describe protected area values management issues and concerns; management strategy focused on immediate priority objectives and strategies; and, directional statements from other planning processes. While strategies may be identified in the MDS, the completion of all these strategies is subject to funding and funding procedures. In addition, all development associated with these strategies within the protected area is subject to the BC Parks Impact Assessment Policy.

TSINTSUNKO LAKES PARK

MANAGEMENT DIRECTION STATEMENT

I. Introduction

A. Setting and Context

The 333-hectare Tsintsunko Lakes Park protects a series of interconnected small lakes and wetlands on Bonaparte plateau. It is situated 40 kilometers northwest of Kamloops, and accessed by logging roads from the Jamieson Creek road.

This protected area was recommended through the Kamloops LRMP process and formally established on April 30th, 1996 as a provincial park through Order-in-Council under the *Environment and Land Use Act*. The park was then designated in Schedule E of the *Park Amendment Act, 1997*.

This Management Direction Statement is intended to provide direction and guidelines for managing Tsintsunko Lakes Park for the foreseeable future.

II. Protected Area Values

A. Conservation

- part of Tsintsunko Lake and a series of interconnected lakes and wetlands
- representative Engelmann spruce, subalpine fir, lodgepole pine forest
- good moose calving and summer habitat, waterfowl
- wild stocks of rainbow trout
- adds to the representation on Bonaparte plateau between Porcupine and Bonaparte protected areas

B. Recreation and Tourism

- pocket wilderness
- trails connecting the lakes for wildlife viewing, natural history observation
- walk-in fishing for quality experience

C. Cultural Heritage

- historical trails, old cabin sites

D. Significance in the Protected Areas System

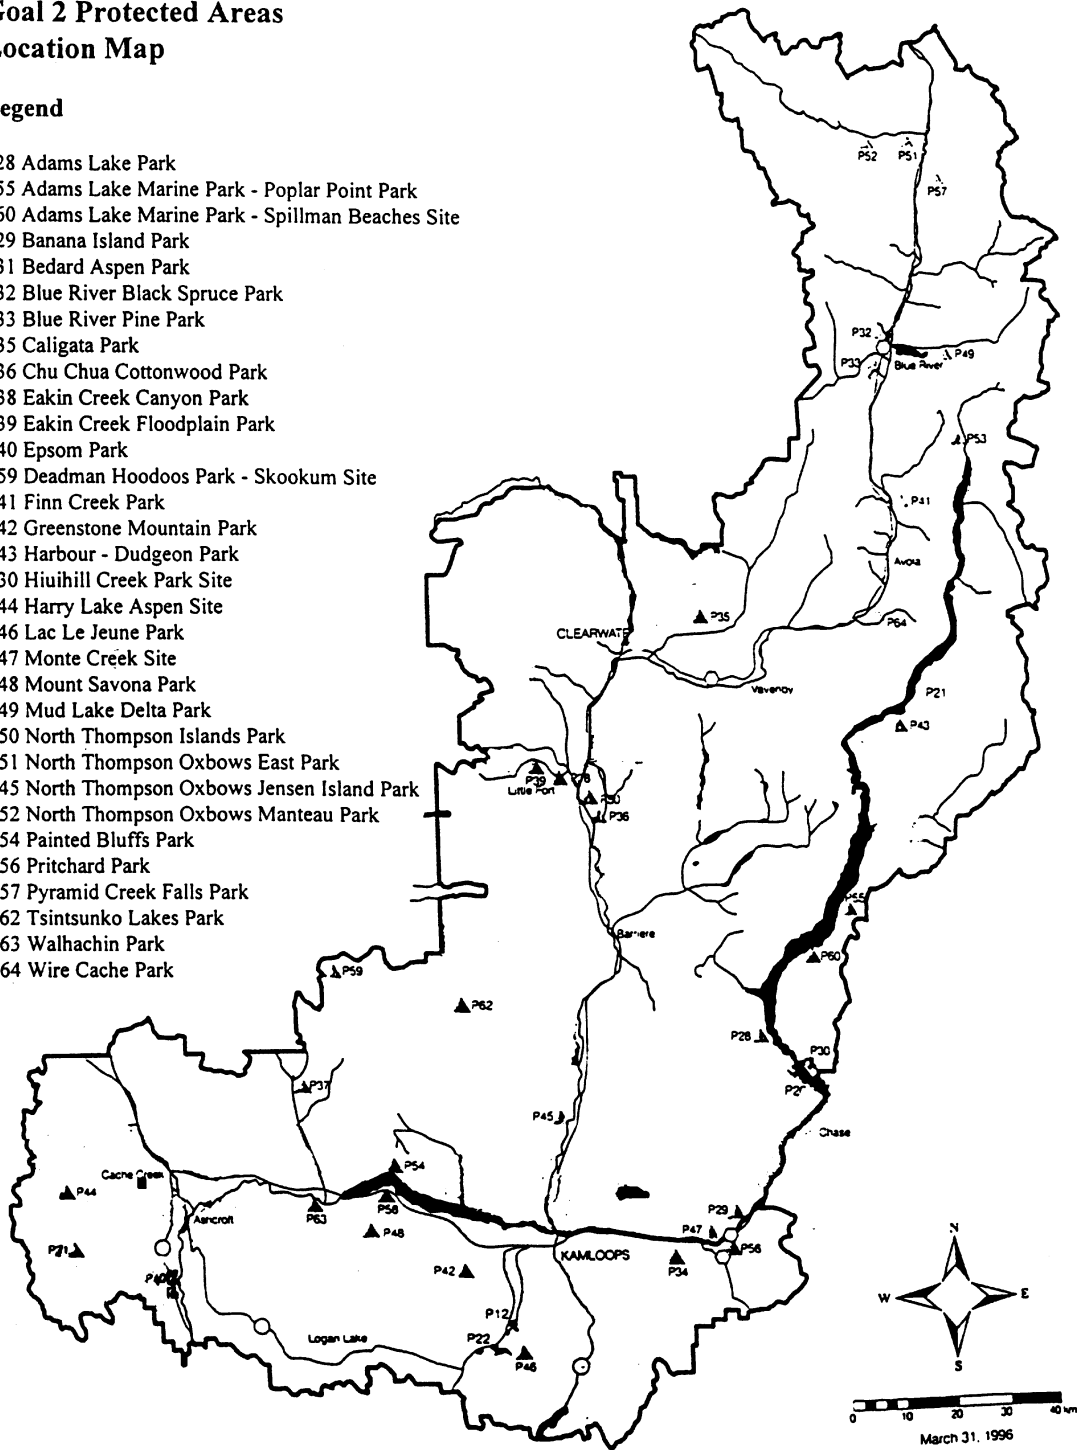

- a small area of interconnected lakes in a plateau wilderness setting between Bonaparte Park and Porcupine Park
- in combination these areas represent the variations to be found in the lower Bonaparte plateau

- P62 Tsintsunko Lakes Park
- P63 Walhachin Park
- P64 Wire Cache Park

III. Other Land Uses and Interests

A. Existing Tenures

- Park designation under the *Park Amendment Act* ensures that all existing liens, charges, and encumbrances other than those applying to commercial logging, mining or energy exploration and development will continue to be authorized through issuance of park use permits. This policy recognizes all existing land act tenures, water rights, trapping licences and other legal tenures and rights.
- Park designation provides for continuance of existing grazing under administration and management of the *Range Act*.

B. Adjacent Patterns of Land Use

- logging roads with new and old cutblocks on the north and west. See Longer Terms Issues and Concerns on page 6.
- ranchers use the land in and adjacent to the park for summer grazing

C. First Nations Interests

- the Shuswap Nation Tribal Council launched a study of traditional uses in the upper Bonaparte Plateau

D. Other Agency Interests

The Park will be managed in close co-ordination with various resource agencies, particularly BC Environment and Ministry of Forests.

- Ministry of Forests manages cattle grazing

E. Private and Public Stakeholder Interests

- resort owners in Bonaparte Park would like to see public recreation encouraged in this area

IV. Management Issues and Concerns

A. Integration with Other Land Use Planning Processes

This management statement, future management plans and all resulting management actions will follow the intent and criteria set out by the Kamloops LRMP for the Tsintsunko Lakes protected area.

Also the park will be planned and managed in co-ordination with the Bonaparte-Tranquille Local Resource Use planning process of the Ministry of Forests to ensure compatibility and complementary support for objectives of the protected area and surrounding forest land base.

B. Consultation and Future Planning

Planning and management of the park will conform to the goals, objectives and guiding principles as set forth in the Provincial Protected Areas Strategy. BC Parks is accountable for planning, administration and management of the park through application of the laws, policies and regulations granted under the *Park Act*. BC Parks will coordinate with other agencies, the LRMP table, various public planning groups and First Nations amending the MDS or developing management plans for all of the new protected areas arising from the Kamloops LRMP.

This Management Direction Statement has been reviewed and approved in principle by the Kamloops LRMP implementation team.

C. Role of the Park

The primary role of Tsintsunko Lakes Park is to protect the plateau setting of lakes, forests and wetlands habitats for public enjoyment and recreation. The park along with Bonaparte and Porcupine Meadows Parks represent the variety of habitats and wilderness recreation opportunities of the lower Bonaparte Plateau. The Park will be managed with backcountry recreation as a primary focus, with minimal facilities (signs and trails) and access restricted to “walk-in” to maintain a quality “pocket wilderness” experience.

D. Zoning

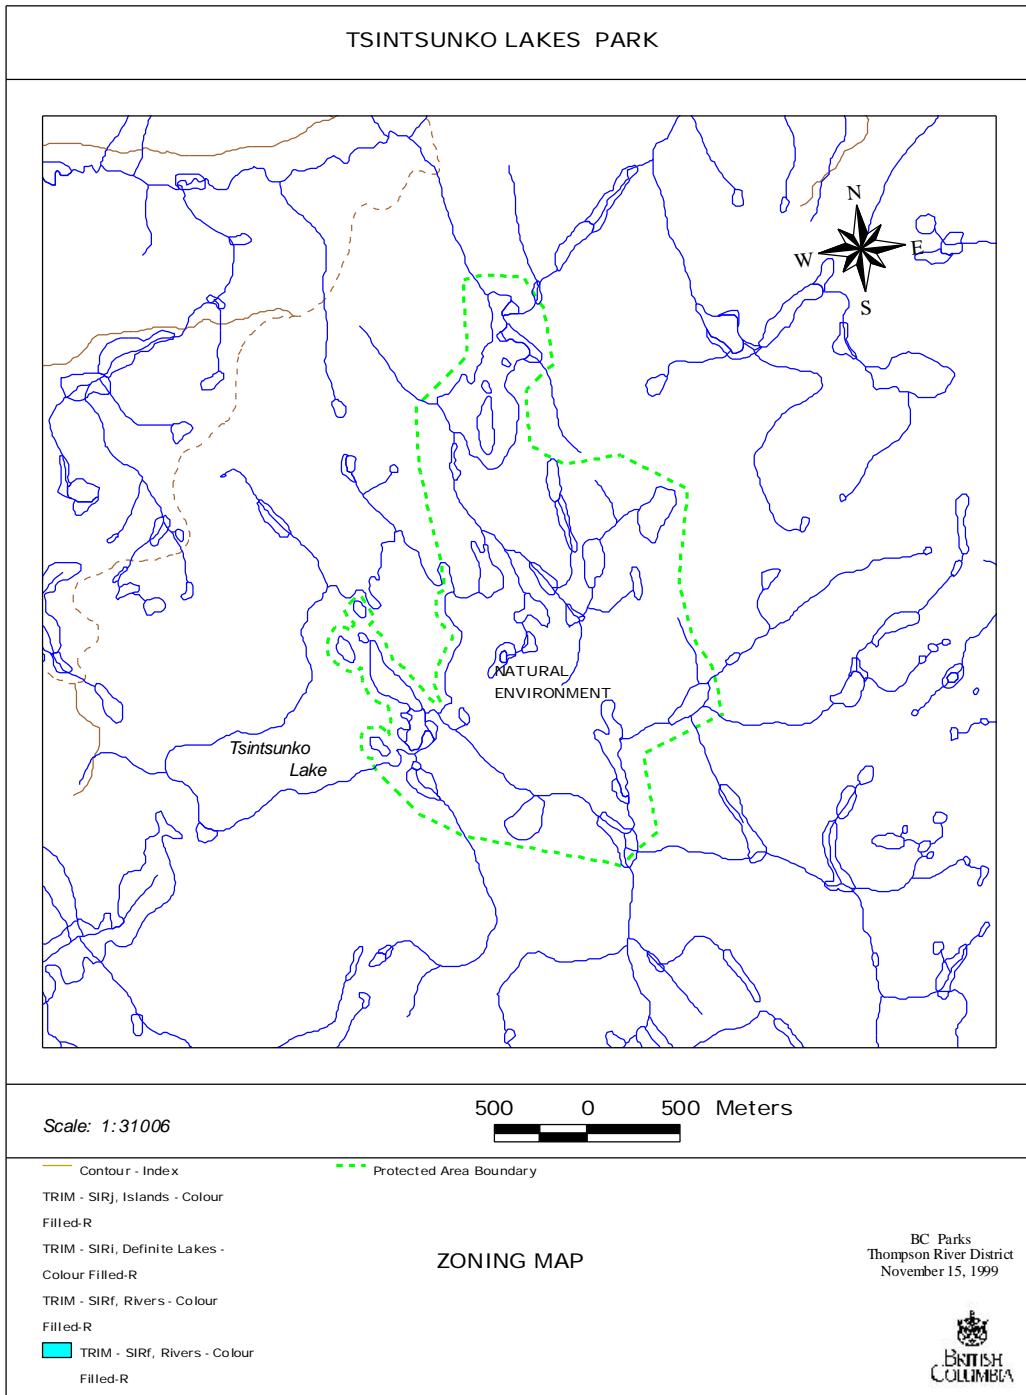

The zoning plan as shown on the adjoining page is preliminary and reflects the intent of the LRMP recommendations for Tsintsunko Lakes Park. The Park is zoned as **Natural Environment** to maintain the area in a natural condition while allowing some recreational use.

E. Management Strategies and Objectives

In addition to accepting the basic principles of maintaining existing tenures and rights, the following objectives will direct the short and long-term management of the area:

- to maintain the natural qualities and conditions of the park
- to foster relationships with First Nations through ongoing consultation and discussion of their concerns and views on protected area management and planning
- to maintain the visual, recreational and tourism values
- to maintain the diversity of wildlife species and habitats
- to discourage the introduction of non-native plant species
- to provide for continued recreation use with opportunities for walk-in fishing, hiking, nature viewing, hunting

Figure 2 - Zoning Map

F. Longer Term Issues and Concerns

Specific issues that will be considered in the longer term can be highlighted under the following topics:

Conservation

- inventory of conservation values
- vegetation management - insect and disease control; fire management; grazing management
- fisheries and wildlife management in coordination with adjacent land and resource use management activities
- forest activities on adjacent lands will be reviewed through the normal Ministry of Forests referral process.

Recreation and Tourism

- access management and maintenance of walk-in opportunities
- recreation use - appropriate activities, levels of use and development
- the impact of visitor management actions at Bonaparte Park on Tsintsunko Lakes Park

Culture

- inventory of archaeological sites
- protection of archaeological sites
- recognition of any identified traditional native uses

G. Short Term Issues and Concerns

The following Activity/Use Matrix outlines guidelines for managing uses, activities and facilities in the Park. These guidelines reflect the intent of the LRMP and, in general principle, follow the policies as set out for use and management of provincial park natural environment zones.

Appendix - Activity / Use Matrix for Tsintsunko Lakes

Activity/Use Facility	Natural Environment
Hunting	Y
Fishing	Y
Trapping	Y ²
Grazing (domestic livestock)	Y
Recreational Gold Panning/Rock Hounding	N
Utility Corridors	N
Communication Sites	N
Horse Use/Pack Animals	Y ³
