BC Parks Statistics Report 2011/12

Summary

Attendance:

Overall park attendance declined by 1.7% in 2011/12. Most of this decline can be attributed to an exceptionally cold and rainy summer throughout many areas of the province. Group use was also down due to fewer student groups visiting them.

Day use attendance declined by 1.9% overall, with decreases showing in the Northern, Kootenay Okanagan, Thompson Cariboo, and West Coast regions. While most of these regions experienced small declines of one to two percent in visitation, parks in the Northern region had close to 10% fewer visitors due to extreme weather conditions which led to flooding and road closures in many park areas.

Camping attendance declined in the Northern, West Coast, and Thompson Cariboo but showed increases in the Kootenay Okanagan and South Coast regions. Many of the parks in the Northern region experienced significant declines in camping attendance (-14%) due to flooding and construction on Hwy 97 — the region's primary highway. Significant declines were also observed in the West Coast due to late spring melt and fewer students attending group sites. Increases to camping visitation were mostly observed in the South Coast region (up 5.5%) as the warm, sunny weather attracted more visitors.

Parks that demonstrated a significant change to visitation are noted on pages 6 to 8 of this report.

Revenues:

Parking fees were removed from provincial parks in March 2011, which contributed to a \$826,000 (93%) decline in day use parking revenue. Revenue from camping fees declined by 1.3% in 2011/12. The largest percentage decline in camping fee revenue (- 16%) occurred in the Northern region due to flooding. Many parks in this region were forced to restrict public access to their campgrounds due to the extreme weather conditions. Other than the Northern region, all other regions had marginal fluctuations in camping fee revenue.

Ski hill permit revenue increased by \$130,000 due to an extended ski season in western BC. Ski hill permit revenue contributed to an eight percent overall increase in Park Use Permit revenues in 2011/12.

Recoveries:

Recoveries to BC Parks were \$325,000 in 2011/12. The majority of this amount was generated by projects in Skagit Valley and Burgoyne Bay as well as recoveries associated with film supervision. Total recoveries declined by \$25,000 in 2011/12 due to fewer funds in the National Park Establishment Account.

BC Parks Budget:

Overall, BC Parks budget expenditures (operating and capital dollars) increased from \$48.7 million to \$53.0 million. The \$4.3 million increase is largely explained by more spending (+ \$0.5 million) on goods and services (i.e. utilities, materials, supplies, operating equipment, etc.) and a \$2.6 million increase in compensation payments required to buy out timber and mineral rights in new parks and conservancies. Amortization also increased by \$1.2 million due to a one time loss associated with the decommissioning of parking machines within day use areas.

Operating Expenditures:

Operating expenditures increased 2.5% with goods and services and amortization expenses contributing mostly to the increase. Deficiency payments increased by about \$500,000 due to the loss of parking revenue retained by park facility operators.

Capital Expenditures:

Capital expenditures increased (+ 15%) in 2011/12, due in large part to compensation used to buy out timber/mineral rights for land that was added to the provincial park system in recent years. Capital investment in park facilities also increased by about \$400,000 in 2011/12. Increased investment in boat launches, picnic shelters, and other facilities was the primary contributor to this increase.

Satisfaction:

Overall visitor satisfaction ratings rose to 82%, exceeding the target of 80% (index scores rated excellent or above average) in 2011/12. On the whole, campground visitors remained highly satisfied with the cleanliness of the grounds, sense of security and control of noise in parks. The service that received the most improved rating was the cleanliness of restrooms (up 5% from 2010/11).

Significant Variances in Camping and Day Use Attendance

Parks with the greatest changes in attendance

This section highlights those parks which show the greatest increases or decreases in attendance. For day use, a greater than 30% and greater than 5,000 total attendance variance criteria is used. For camping the criteria used to highlight critical changes is 10% and greater than 1,000 in total attendance. The appendices provide individual variances in attendance and revenue for all parks.

2011 BC Parks Visitor Satisfaction Survey

The Visitor Satisfaction Survey assesses the ministry's effectiveness in achieving client satisfaction with protected areas and campground facilities and services. Key parks are surveyed on a rotational basis, every 4 years. Surveys are usually undertaken yearly from May 15 to the first week of September. BC Parks overall visitor satisfaction rating is based on an index of visitor responses to questions about five services: cleanliness of restrooms; cleanliness of grounds; sense of security; control of noise; and, condition of facilities.

Park Facility Operator performance remains at a high overall level. Campground visitors are highly satisfied with the cleanliness of the grounds (92 per cent of visitors rated this as excellent or above average in 2011) and sense of security (about 84 per cent excellent or above average). The lowest rating was given to the cleanliness of restrooms (about 75 per cent excellent or above average in 2011).

Note: The surveys are based on sound statistical principles, design and methodology. All ratings are based on responses of “excellent” and “above average” to the survey questions. Key parks are surveyed on a rotational basis, every 4 years. Surveys are usually undertaken yearly from May 15 to the first week of September. The Visitor Satisfaction Index is a provincial average based on the overall rating of campers and park visitors in the following five categories: cleanliness of restrooms, cleanliness of grounds, condition of facilities, sense of security, and control of noise.
