

Waste Diversion Protocol

This protocol is established by the Director named under the Carbon Neutral Government Regulation (B.C. Reg. 392/2008) who serves as the Director under the Emission Offsets Regulation (B.C. Reg. 393/2008).

Under authority of Section 7(1) of the Emission Offsets Regulation the director establishes the following protocol in relation to waste diversion projects:

Waste diversion project reports in Section 5 may include an assertion of emissions reduction from the cumulated emissions reduction for any portion of the validation period regardless of the date of the project report within that validation period, but the asserted project reduction may only include those reductions that result from project activities that have been completed. An emissions reduction for these types of projects is equal to a project reduction.
