

3.2 Maintenance and Export of Full TEIS Environment

Depiction of the processes involved in the preparation of the full TEIS Environment dataset for migration to the LRDW ArcSDE geodatabase. Process number tags such as 3.2.1 refer to subsections of the **TEIS Environment** document which describes the use of the scripts.

3.3 Preparing Legacy Data for Incorporation into the TEIS Environment

Depiction of the processes involved in the preparation and quality control of legacy mapping project data in the structure of the TEIS Environment. It is recommended that these workflow processes be performed in isolation from the full TEIS Environment, eg. in a copy of the Contractor Package. Process number tags such as 3.3.1 refer to subsections of the **TEIS Environment** document which describes the use of the scripts.

3.4 Preparing New Mapping Project Data for Submission

Depiction of the processes involved in the preparation and quality control of new mapping project data in the geodatabases of the Contractor Package. Process number tags such as 3.4.1 refer to subsections of the **TEIS Environment** document which describes the use of the tools.
