

DISTRIBUTION of AREAS AFFECTED by ACTIVE PERIGLACIAL PROCESSES and LARGE MASS MOVEMENTS, KLAPPAN WATERSHED

This map shows the total area affected by the processes shown in Figures 56 and 57. The map also shows areas where the periglacial processes occur in conjunction with either slope failures and/or snow avalanching.

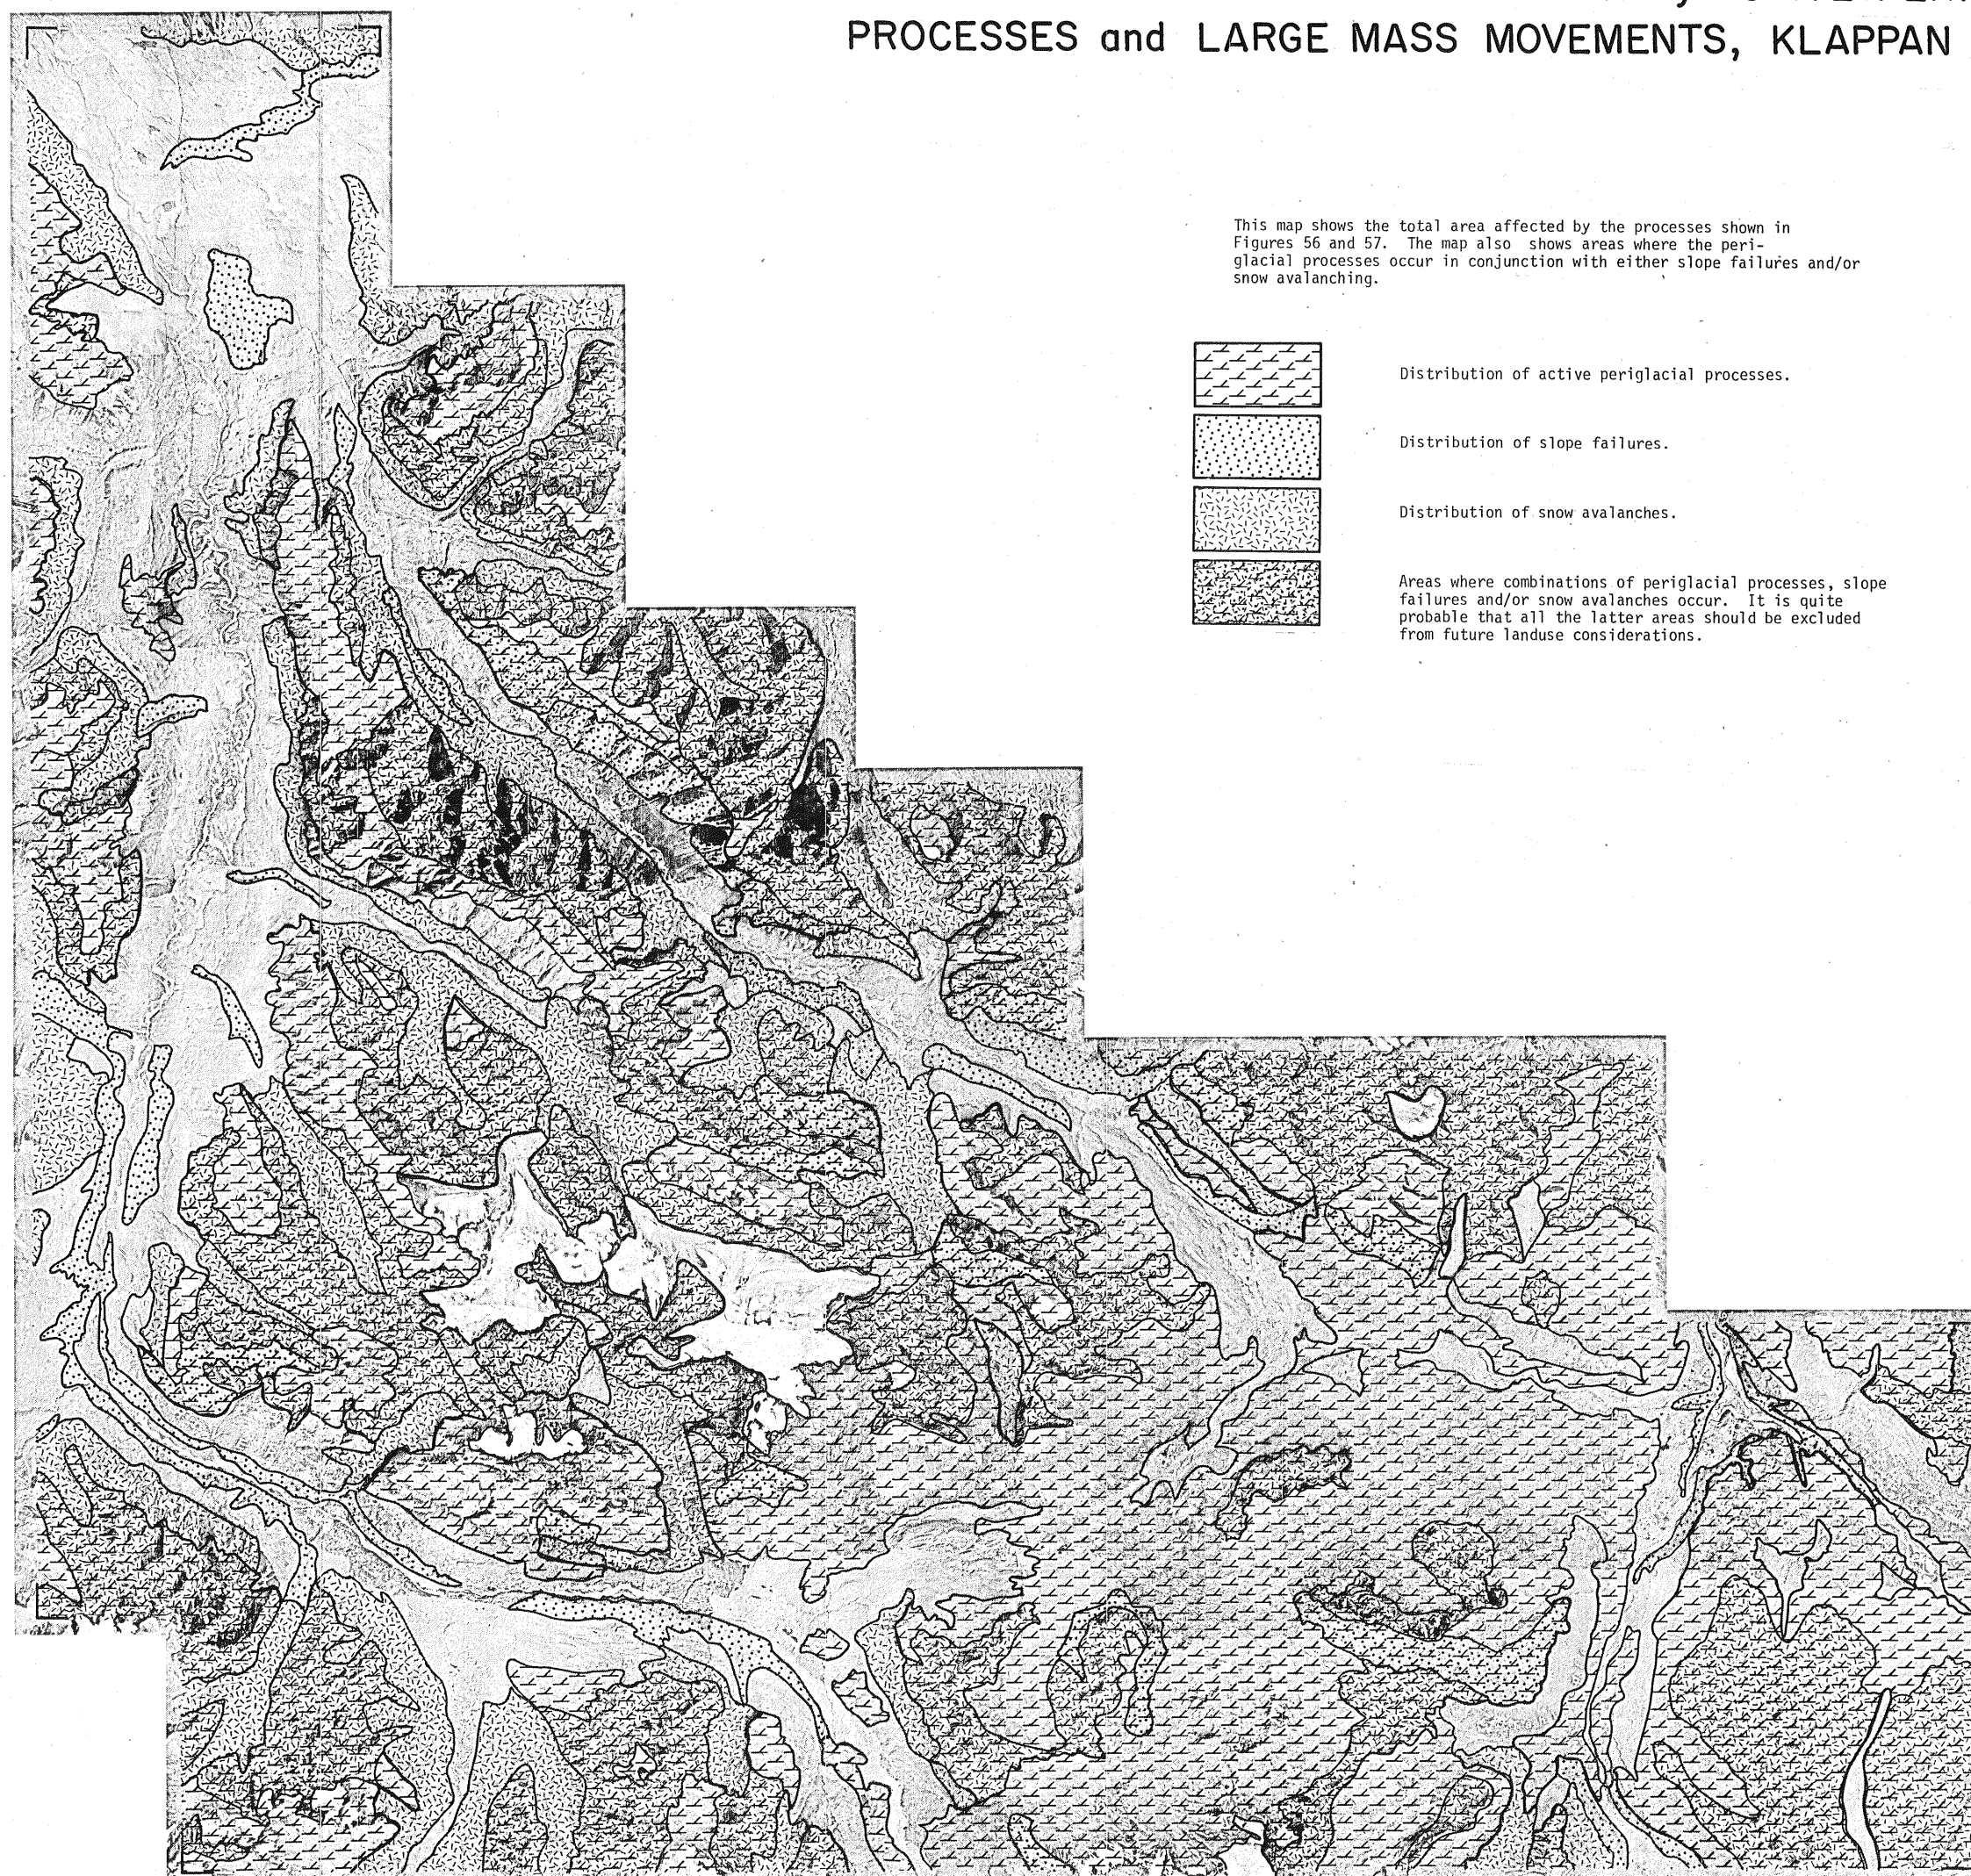

Distribution of active periglacial processes.

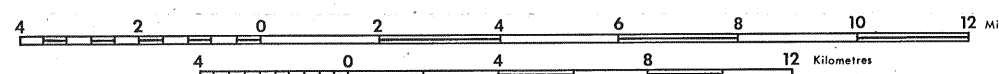

Distribution of slope failures.

Distribution of snow avalanches.

Areas where combinations of periglacial processes, slope failures and/or snow avalanches occur. It is quite probable that all the latter areas should be excluded from future landuse considerations.

Scale 1:200,000
