TO ALL B.C. LICENSED FISH BROKERS:

Re: 2008 Annual Fisheries Production Schedule (AFPS) – due February 16, 2009

“In 2007 the wholesale value of British Columbia seafood was \$1,296.6 million.”

Source: 2007 British Columbia Seafood Industry Year in Review

We were able to generate this information by surveying B.C. seafood sellers. Most of the seafood value is generated by B.C. fish brokers - like you - as well as licensed buyers and processors.

Each year the Ministry of Environment conducts a census of the seafood industry. For fish brokers the information is collected under authority of Section 23.1(4) of the Fish Inspection Regulation using the AFPS.

Your contribution to the census is a requirement of your fish broker licence and ensures that we are collecting complete information on the British Columbia seafood industry.

The 2008 Annual Fisheries Production Schedule (AFPS) is due **February 16, 2009**.

Quick List for Completing the AFPS:

- For operations reporting B.C. seafood sales remember to:
 - Report all seafood sold in 2008 as a product of B.C. - to retail or exported;
 - Include all seafood in inventory in its final form and value at prevailing prices; and
 - Sign and return the completed report.

- For operations with no sales to report remember to:
 - Complete pages 1 & 2 of the AFPS form; and
 - Sign and return the completed report.

- ! ➤ Remember the report must be signed and returned - even if it is “NIL” - to satisfy your reporting requirements.

Detailed instructions for completing the schedule and a self-addressed postage-paid envelope have been provided for your convenience. If you wish to complete and submit the form **electronically** please go to: <http://www.env.gov.bc.ca/omfd/fishstats/forms/afps.html>

Be assured that **data from individual forms and companies will be protected** within the provisions of the *Freedom of Information and Protection of Privacy Act*. The information they contain is held in complete confidence and is only published in aggregate form (combined data from three or more companies).

The data we collect on the Annual Fisheries Production Schedules is used extensively to highlight the importance of the B.C. seafood sector and its products. One example is the British Columbia Seafood Industry Year in Review series (2007 issue enclosed); another example is the B.C. Seafood Statistics website.

The Year in Review series as well as statistical tables and information from 2007 (and earlier) can be found at: <http://www.env.gov.bc.ca/omfd/fishstats>.

Thank you in advance for your participation. We appreciate your timely cooperation with our reporting schedule and are always available to assist should you have questions or concerns.

Yours truly,

Carmen Matthews
Senior Seafood Statistics Officer
Oceans and Marine Fisheries Branch
