## River Forecast Centre

---

### High StreamFlow Advisory ENDED: 22Jun2009 2:00PM

The **High Streamflow Advisory** is **ENDED** for:

- Quesnel River

The water level on the Quesnel River peaked early Friday and has now begun to recede. The weather forecast is favourable, and the Quesnel River is expected to continue recession through the week.

---

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
