

Viewing Wildlife Habitat Features through Habitat Wizard

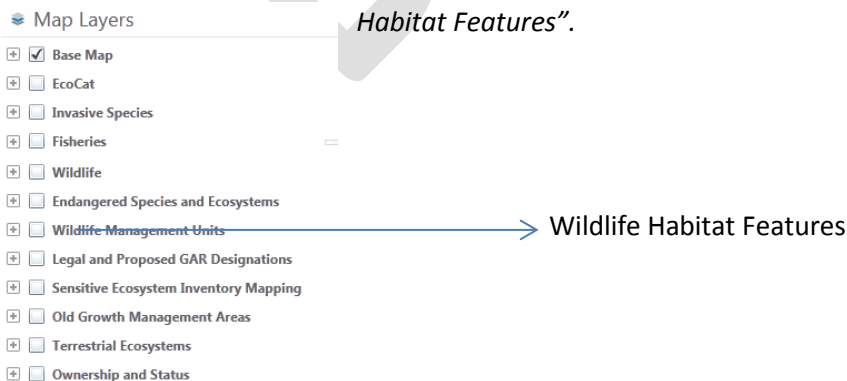

Step 1: Go to the Habitat Wizard website <http://maps.gov.bc.ca/ess/sv/habwiz/>

Step 2: You will notice on the Left side bar below “Map Layers” that “Fisheries” has a check mark beside it. **Uncheck it.**

Step 3: *NOTE: The Wildlife Habitat Features layer is not ready at this time. Once ready, a new category will be added under “Map Layers” that will occur just under “Wildlife” layer that will say “Wildlife Habitat Features”.*

At this time, for Example only, we will use the Wildlife layer to see how to view information.

Click in the box left of “Wildlife” to check it and then click the plus sign to expand the map layer. Click in the box left of “Wildlife Species Inventory” to check it and then click on the plus sign . It will change to the minus sign and a list of features will be displayed below it. To select the layer you are interested in, you click the empty box and that adds a check mark thus selecting the feature .

In the example below we selected the “Mammals” and “Reptiles” layers.

Step 4: Running along the top of the screen you will notice some “Navigation Tools”.

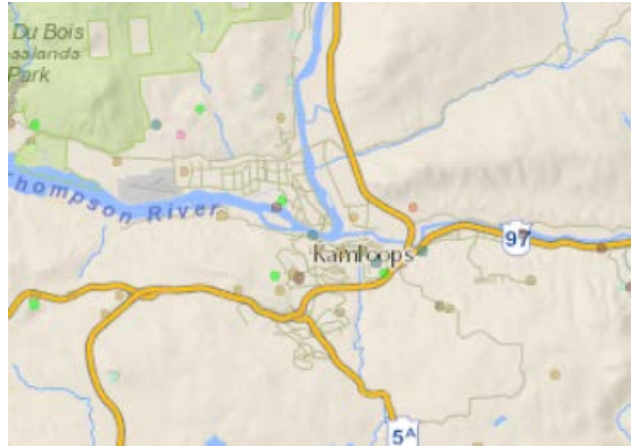

Select the “Navigation Tool” you want to perform. You will notice that it will become highlighted.

 Click on the map to **zoom in** or click and drag a box to zoom in around a specific area.
Zoom In

 Click on the map to **zoom the map out**.
Zoom Out

 Click and drag the map in the direction you want to **move the map**.
Pan

The feature points will not be displayed until you are zoomed in sufficiently.

NOTE: You will know you are zoomed in enough and the features have been activated when the layers text are darkened.

- Wildlife**
- Wildlife Species Inventory - Incidental...**
 - WSI - IO - Nonsensitive
 - WSI - IO - Mammals - Nonsensitive
 - WSI - IO - Birds - Nonsensitive
 - WSI - IO - Reptiles And Amphibians - N

Light text - layer not active

- Wildlife**
- Wildlife Species Inventory - Incidental...**
 - WSI - IO - Nonsensitive
 - WSI - IO - Mammals - Nonsensitive
 - WSI - IO - Birds - Nonsensitive
 - WSI - IO - Reptiles And Amphibians - N

Dark text - layer is active

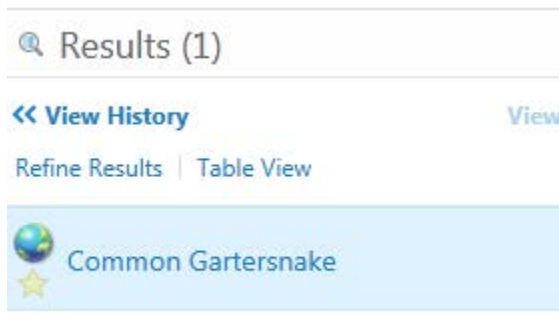

Step 5: To select a data point and display attribute information click the “Point Identify” tool located at the top of the screen

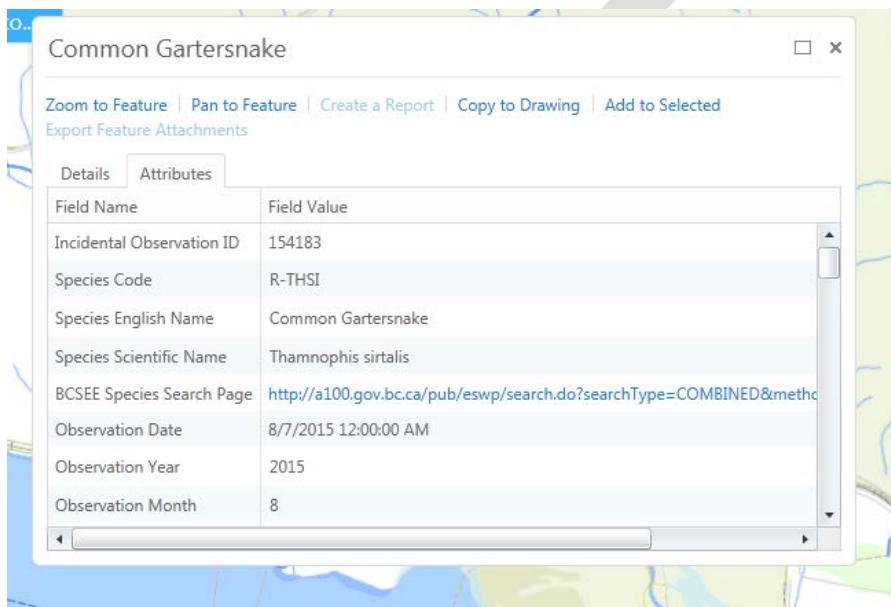

On the map click on a data point you are interested in.

On the left hand side of the screen you will notice that the results of your query are displayed

Click on the name (in this example Common Gartersnake point was selected) and it will display attribute data of the point you clicked on.

If you click on the URL link next to “BCSEE...” You will be directed to the BC Species and Ecosystems Explorer webpage for this species. At this location you will find links to recovery plans, management plans, etc. If you scroll down further and click on the link next to “Project Web Page” you will be directed to the project report and data.
