

BULL MOUNTAIN - POWER PLANT
LEGEND TO HABITAT TREATMENT UNITS

MAP SYMBOL	MANAGEMENT PRESCRIPTION
MB	maintain stand untreated, area has important biodiversity value, either has features rare on landscape, supports rare plant species, and/or provides habitat to important non-ungulate species
MC	maintain stand untreated and let grow to provide movement corridors or cover
MO	maintain stand untreated, representative of rare older age classes
MS	maintain area untreated, sensitive soils and/or extreme terrain, high elevation
PG	protect from cattle grazing
FRES	reservoir
RR	restore riparian attributes through restoration activities using native species, eliminating cattle grazing
TB-L	treat with manual brushing or low intensity burning spatially distributed over polygon in patches with 20-25 year rotation
TB-M	treat with moderate intensity burning, spatially distributed over polygon in patches with a 20-25 year rotation
TG	treat with cattle grazing within polygon
TP-M	treat with small patch openings created by timber harvest that are maintained by moderate intensity burning
TS	treat by seeding with dry forest interm grazing mix, 70% orchard grass, 19% slender wheatgrass, 6% white clover, 3% rangeseeder rambler alfalfa
