

A horizontal conversion scale for temperature. The top axis is labeled 'F' (Fahrenheit) and ranges from 100 to 600 in increments of 100. The bottom axis is labeled 'C' (Celsius) and ranges from 0 to 300 in increments of 100. The text 'CONVERSION SCALE FOR TEMPERATURE' is written vertically along the right side of the scale.

Diagram illustrating the relationship between True North (TN), Grid North, and Magnetic North. The diagram shows a vertical line for True North (TN) with a star at the top. Below it, a vertical line for Grid North is shown, with a distance of 0' 42" or 12 Mils. Further down, a line for Magnetic North is shown, with a distance of 25' 46" or 458 Mils. The angle between Grid North and Magnetic North is labeled as 35'.
