

TERRACE-HAZELTON FOREST RESOURCES STUDY

LAND CAPABILITY FOR FORESTRY

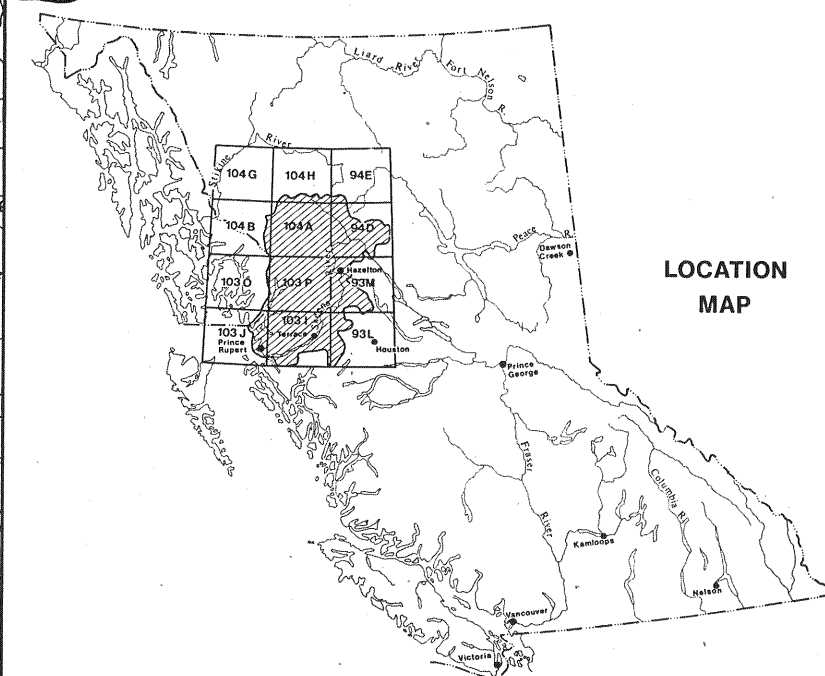

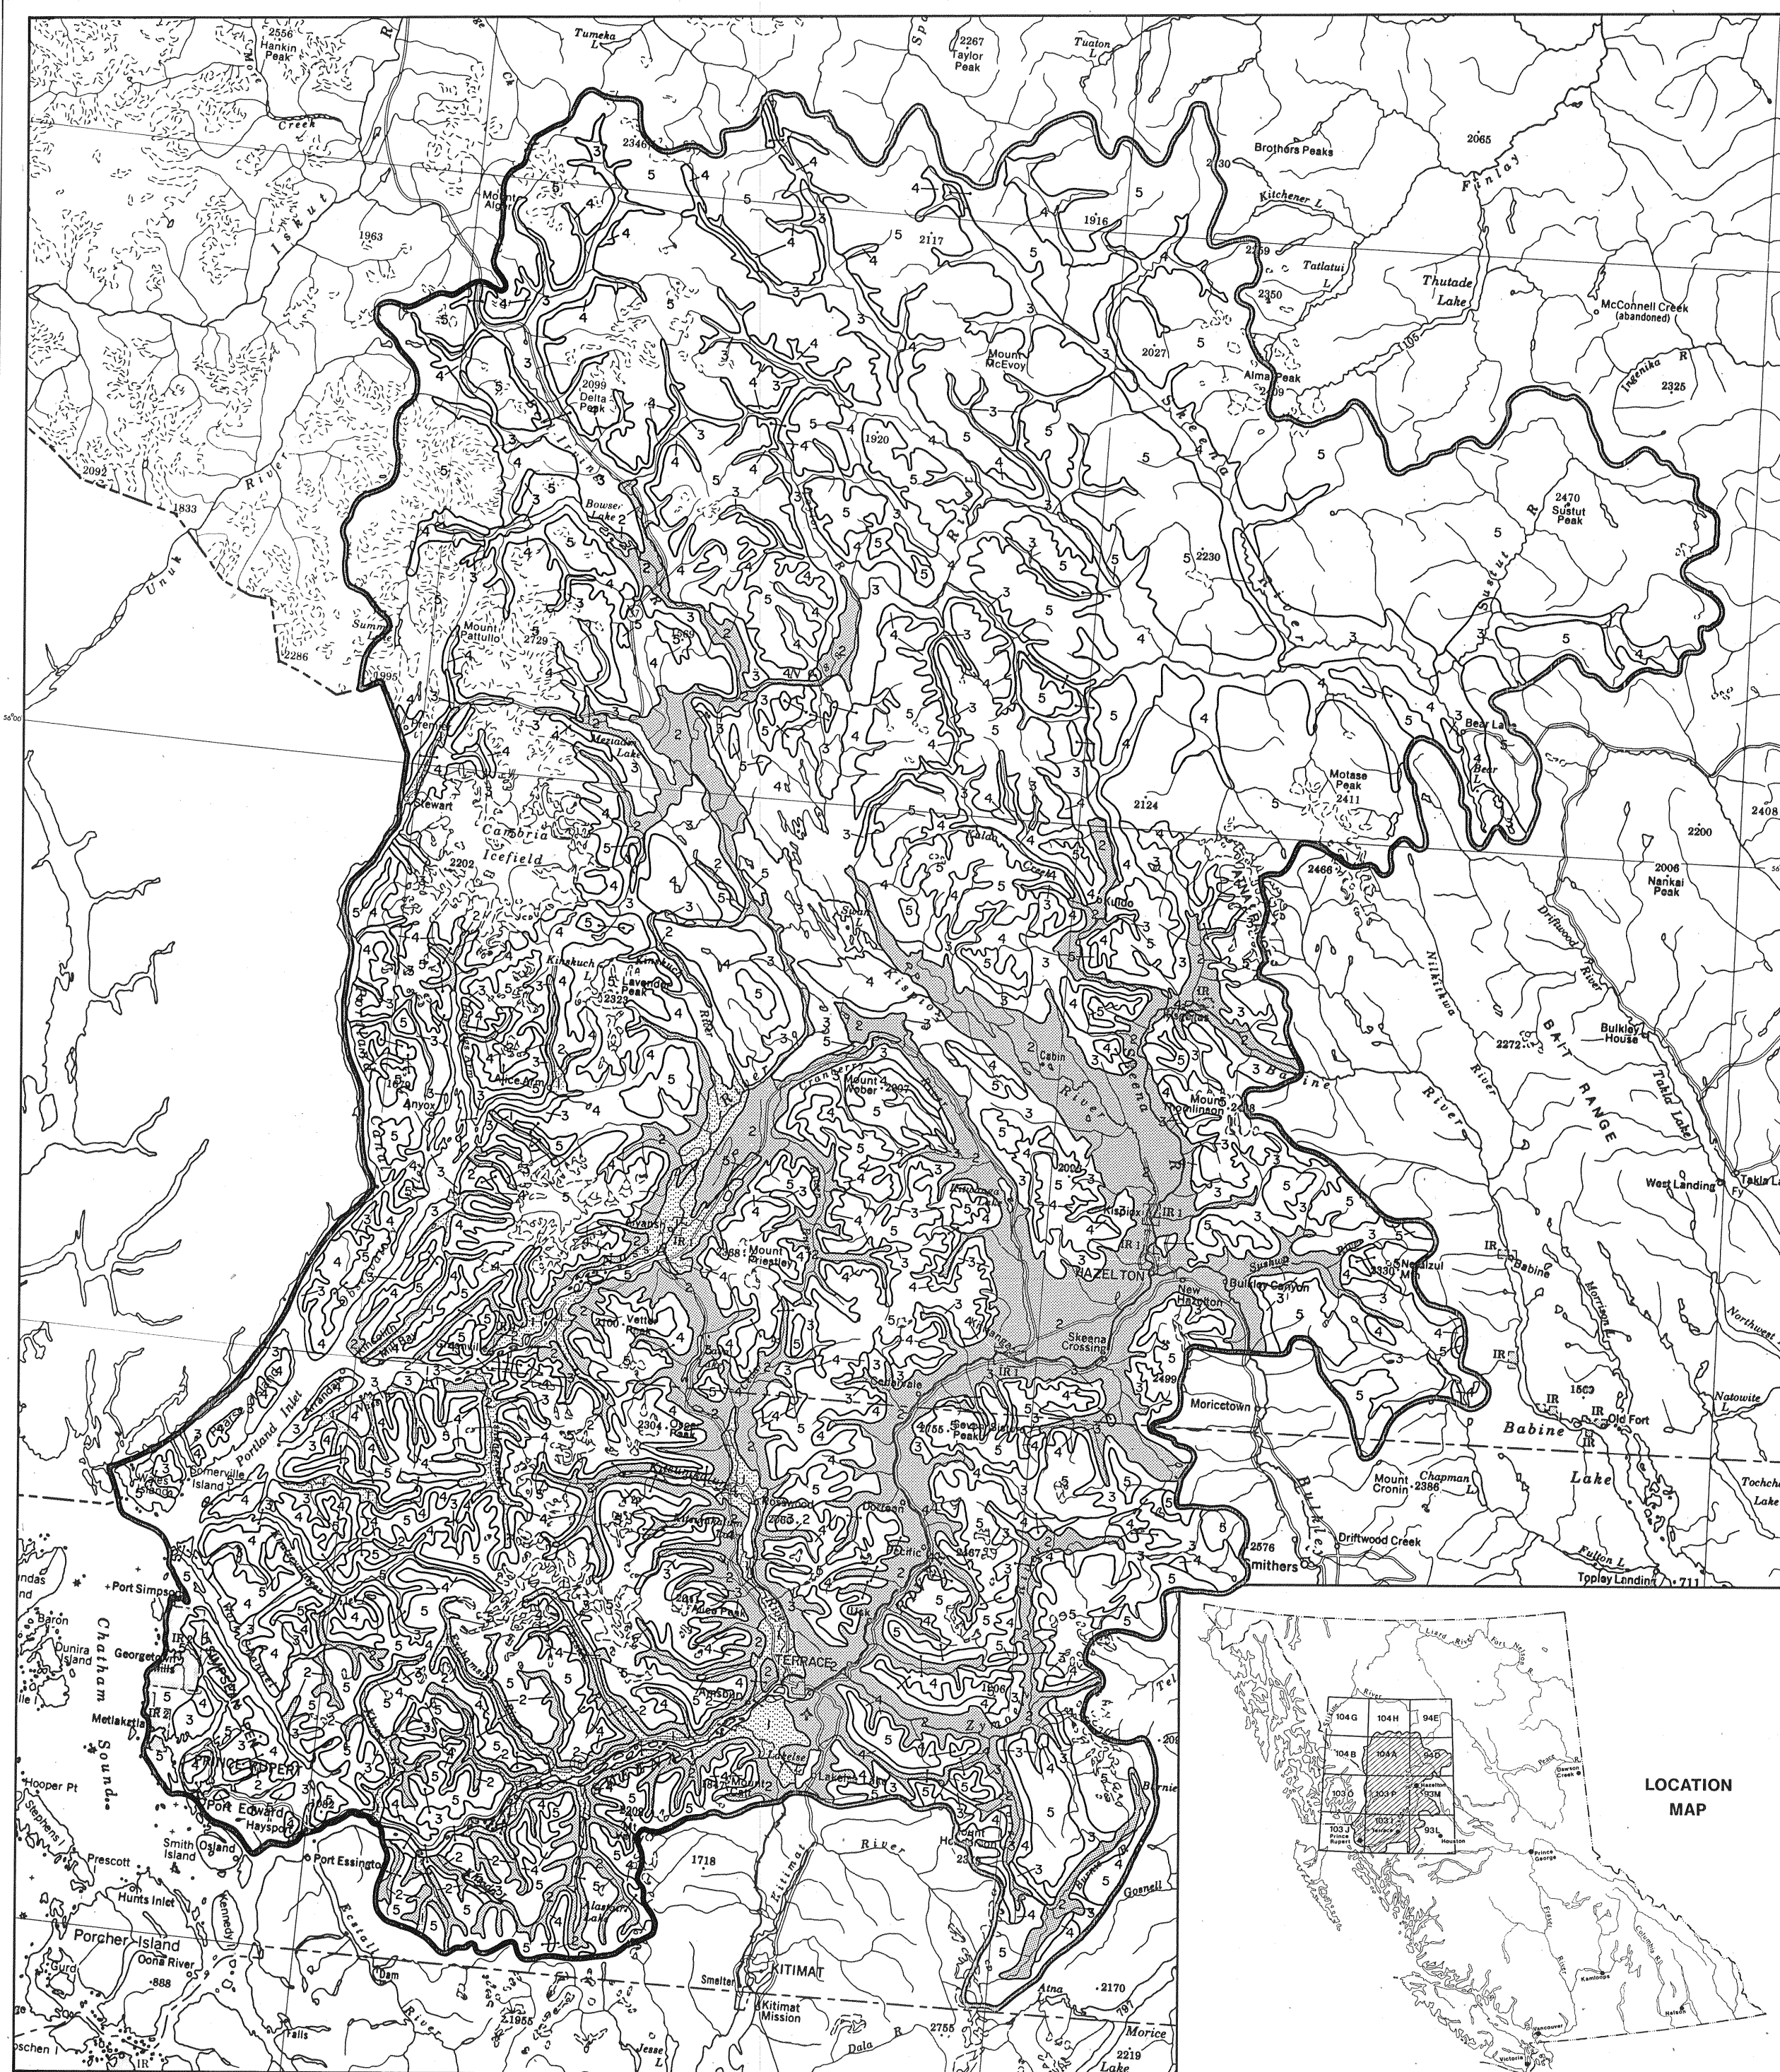

1	Very High	MAI greater than 110 ft. ³ /ac./yr.
2	High	MAI 70 - 110 ft. ³ /ac./yr.
3	Moderate	MAI 50 - 70 ft. ³ /ac./yr.
4	Low	MAI 30 - 50 ft. ³ /ac./yr.
5	Very Low	MAI less than 30 ft. ³ /ac./yr.

MAP SHEET NUMBER:-

94D	} Forest capability rating determined by photo- interpretation of materials with respect to elevation with no field checking
94E	
104A(W)	
104H	
104B	

93L	} Forest capability rating determined by pre- liminary assessment of relationship between landform materials and vegetative zonation with some field checking. Some forest capability plot data available
93M	
1031-J	
1030-P	
104A(S)	

Note:
Generalized from 1:250,000 Forest Capability maps. The dominant capability only is expressed on this map; whereas composite units are shown on the more detailed 1:250,000 manuscripts.

ENVIRONMENT AND LAND USE COMMITTEE SECRETARIAT VICTORIA, B.C.
