

## Air

### Status of Ground-Level Ozone in B.C. (2019-2021)

British Columbia operates a network of air monitoring stations that measure ground-level ozone and other air pollutants. This indicator reports on the concentration of ground-level ozone from 2019-2021 and compares it to the [Canadian Ambient Air Quality Standard](#) established by the [Canadian Council of Ministers of the Environment](#).

- **Ground-level ozone is an air pollutant.** While ozone in the Earth's atmosphere occurs naturally, additional ozone at the ground level is a pollutant. It forms through chemical reactions involving nitrogen oxides and volatile organic compounds in the presence of sunlight.
- **Ground-level ozone can be harmful to humans.** Exposure to ground-level ozone (hereafter ozone) can reduce lung function and cause inflammation of airways, which can increase respiratory symptoms and aggravate asthma<sup>1</sup>. These effects are linked to more emergency room visits, hospitalizations, and absenteeism, and higher health care costs<sup>2</sup>.
- **Ozone levels met the Canadian Ambient Air Quality Standard at 48 of 48 B.C. ozone monitoring stations.** Ozone levels (see box below) from the 48 stations ranged from 38 to 58 parts per billion (ppb). Ozone levels were  $\leq 50$  ppb at 31 reporting stations (65%). Zero stations reported ozone levels  $> 62$  ppb.
- **Ozone levels met the Canadian Ambient Air Quality Standard in six of B.C.'s seven air zones.** The ozone level for an air zone is the highest ozone level reported from monitoring stations within the air zone. Currently, there are no [air monitoring stations](#) in the Northwest Air Zone.
- **Ozone levels are used to set management levels for each air zone.** Four management levels (green, yellow, orange, and red) are each associated with a suite of actions that become more rigorous as ozone levels approach the Canadian Ambient Air Quality Standard.

#### Ground-Level Ozone: Canadian Ambient Air Quality Standard

Ozone levels are calculated using a statistical form called the ozone metric.

The Canadian Ambient Air Quality Standard value for ozone is **62 parts per billion (ppb)**.

The ozone standard is achieved when ozone levels are  $\leq 62$  ppb.

#### What is an Air Zone?

British Columbia is divided up into seven air zones, which are areas that typically exhibit similar air quality characteristics, issues, and trends.

The map and chart below summarise Canadian Ambient Air Quality Standard achievement status for ozone in B.C. air zones, as well as ozone levels at individual monitoring stations. Summaries are given for each monitoring station where sufficient data was available for the 2019-2021 reporting period.

**Status of Ground-Level Ozone Levels in B.C. Air Zones (2019-2021)**

**Airzones:**

Ozone Air Quality Standard

**Monitoring Stations:**

Ozone (ppb)

Ozone Metrics for Air Monitoring Stations within B.C. Air Zones (2019-2021)

## More about the Canadian Ambient Air Quality Standard ozone metric:

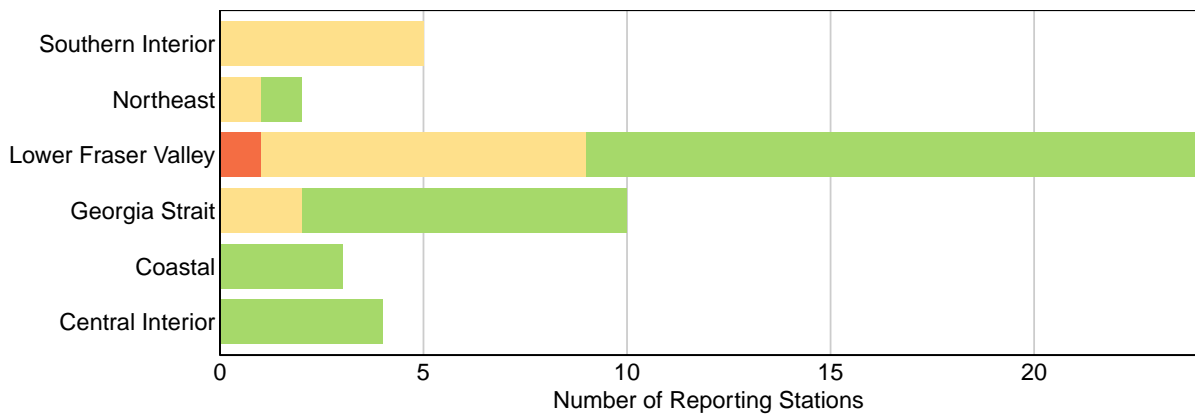

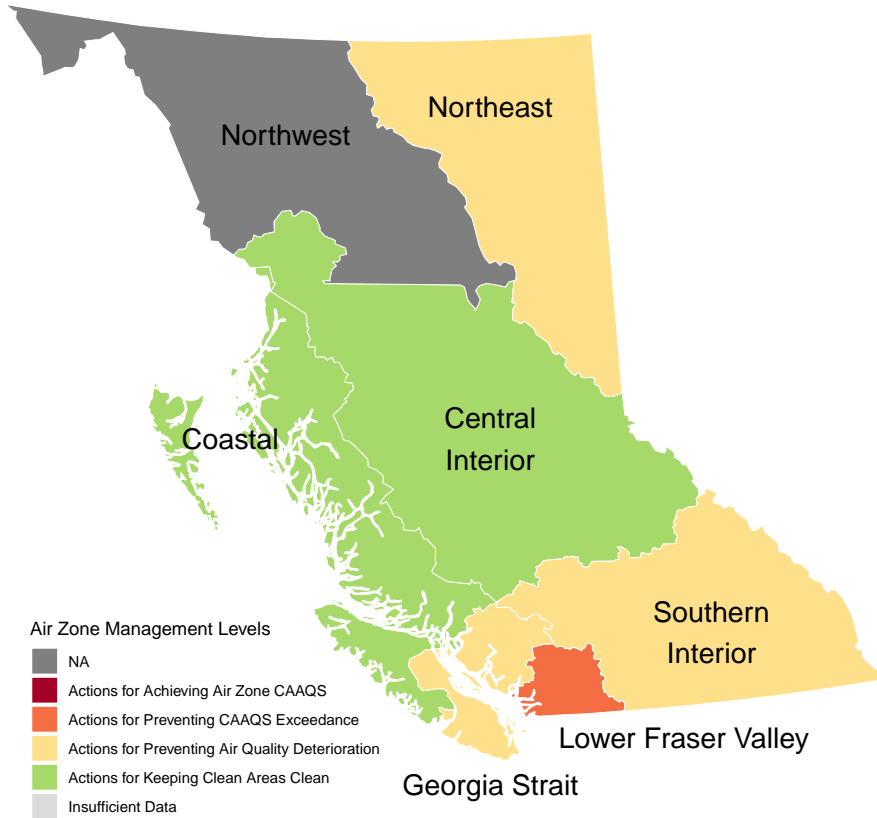

- The statistical form of the Canadian Ambient Air Quality Standard ozone metric is the 3-year average of the annual 4th-highest daily maximum 8-hour rolling average concentration.
- The ozone metric for an air zone is the highest ozone metric reported from monitoring stations within the air zone. Air zone metrics are only taken from stations reporting on two years of data when there are no available three year reporting stations in the air zone.
- Only air monitoring stations with sufficient data on ozone concentrations for the 2019-2021 reporting period were included in this indicator. Visit [Current Air Quality Data](#) for a complete list of air monitoring stations across B.C.
- Data completeness and sufficiency criteria for the ozone metric value are described in the [Guidance Document on Achievement Determination: Canadian Ambient Air Quality Standards for Fine Particulate Matter and Ozone \(2012\)](#).

## Canada-wide Air Quality Management System

The Air Quality Management System is Canada's approach for protecting air quality. Under the Air Quality Management System, provinces and territories monitor, report and manage local air quality within air zones, with the goal of continuously improving air quality and keeping pollutants below the Canadian Ambient Air Quality Standards.

- There are seven air zones in British Columbia: Coastal, Georgia Strait, Lower Fraser Valley, Southern Interior, Central Interior, Northeast and Northwest.
- The Air Zone Management Framework defines management levels based on the highest ozone level reported from monitoring stations within the air zone. The four management levels are (1) green (actions for keeping clean areas clean); (2) yellow (actions for preventing air quality deterioration); (3) orange (actions for preventing Canadian Ambient Air Quality Standard exceedance); and (4) red (actions for achieving air zone Canadian Ambient Air Quality Standard). Actions for each management level are detailed in the [Guidance Document on Air Zone Management \(2019\) \(PDF\)](#). Air zone management levels are preferentially based on stations with 3 complete years of data.
- The Coastal and Central Interior air zones were assigned to a green management level. The Southern Interior, Georgia Strait, and Northeast air zones were assigned to a yellow management level, and the Lower Fraser Valley was assigned to an orange management level. Currently, there are no [air monitoring stations](#) in the Northwest air zone.

Management Levels for Ground-Level Ozone in B.C. Air Zones (2019-2021)

## More about the Air Quality Management System management levels:

- There can be cases when an air zone does not achieve a given Canadian Ambient Air Quality Standard because of sources over which jurisdictions have little or no control, such as those related to transboundary flows and exceptional events, like forest fires.
- Prior to determining management levels, jurisdictions have the option of adjusting their air zone metric values to remove such external influences. These arrangements aim to ensure that jurisdictions are responsible for managing only the emissions sources they can control.
- Wildfire influences were determined for 8 monitoring sites in B.C. on a total of 1 day for the 2019-2021 reporting period. The daily concentrations for these days were removed from the calculations of management levels, but this resulted in no changes in management levels for ground-level ozone.

## Methods

The methods used to develop this indicator—including procedures, data requirements, and calculation of the Canadian Ambient Air Quality Standard ozone metric—are detailed in the [Guidance Document on Achievement Determination: Canadian Ambient Air Quality Standards for Fine Particulate Matter and Ozone \(2012\)](#) published by the [Canadian Council of Ministers of the Environment](#).

**R package and code:** We have developed an [R](#) package to facilitate the calculation of air quality metrics according to the [Canadian Ambient Air Quality Standards](#). Download the 'rcaqs' package from [GitHub](#). The source code for repeating the analysis presented on this page is also available on [GitHub](#).

## Appendix: Detailed Ground-Level Ozone Canadian Ambient Air Quality Standard Results for Monitoring Stations within Air Zones in B.C. (2019-2021)

**Air Zone:** Central Interior

**Monitoring Station:** Prince George Plaza 400

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 49 ppb (3 year average)

**Air Zone:** Central Interior

**Monitoring Station:** Quesnel

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 46 ppb (3 year average)

**Air Zone:** Central Interior  
**Monitoring Station:** Smithers  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 44 ppb (3 year average)

**Air Zone:** Central Interior  
**Monitoring Station:** Williams Lake Columneetza School  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 49 ppb (3 year average)

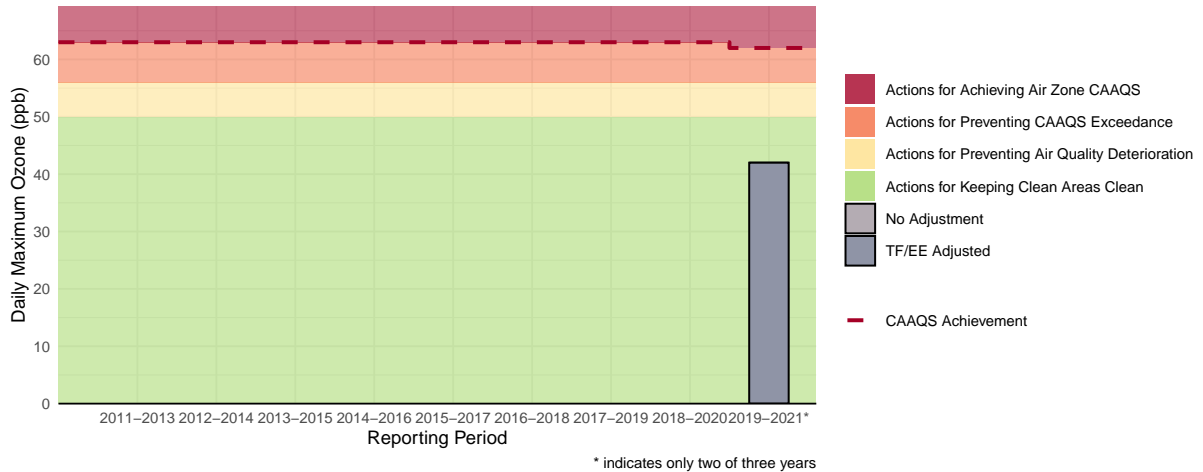

**Air Zone:** Coastal

**Monitoring Station:** Kitimat Whitesail

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 42 ppb (2 year average)

**Air Zone:** Coastal

**Monitoring Station:** Prince Rupert Fairview

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 41 ppb (3 year average)

**Air Zone:** Coastal

**Monitoring Station:** Terrace Skeena Middle School

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 44 ppb (3 year average)

**Air Zone:** Georgia Strait

**Monitoring Station:** Colwood City Hall

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 51 ppb (3 year average)

**Air Zone:** Georgia Strait

**Monitoring Station:** Courtenay Elementary School

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 48 ppb (3 year average)

**Air Zone:** Georgia Strait

**Monitoring Station:** Duncan

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 49 ppb (3 year average)

**Air Zone:** Georgia Strait

**Monitoring Station:** Nanaimo Labieux Road

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 45 ppb (3 year average)

**Air Zone:** Georgia Strait

**Monitoring Station:** Squamish Elementary

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 44 ppb (3 year average)

\* indicates only two of three years

**Air Zone:** Georgia Strait

**Monitoring Station:** Victoria Topaz

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 45 ppb (3 year average)

**Air Zone:** Georgia Strait

**Monitoring Station:** Whistler Meadow Park

**Ozone Air Quality Standard:** Achieved

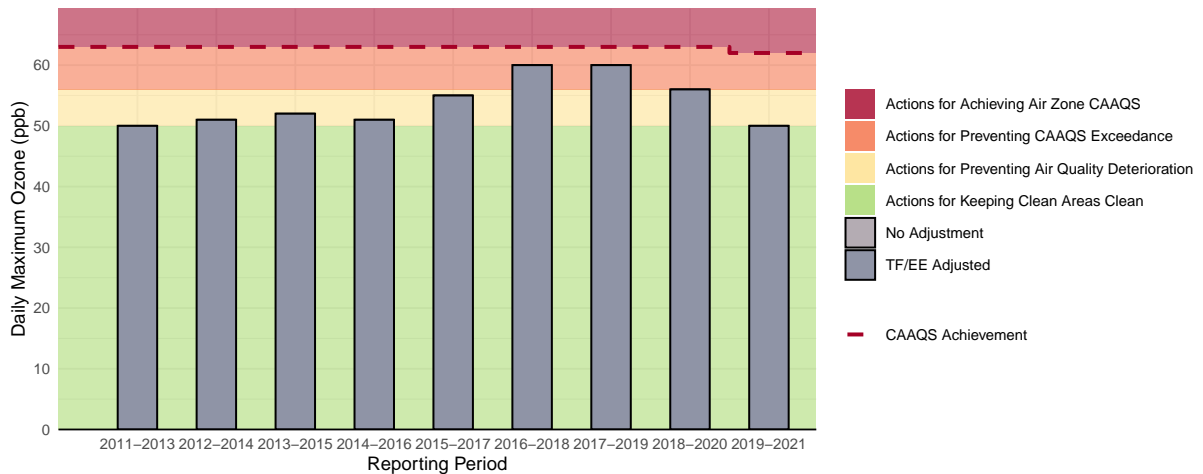

**Ozone Metric:** 49 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Abbotsford A Columbia Street  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 52 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Abbotsford Central  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 50 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Agassiz Municipal Hall  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 54 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Burnaby Kensington Park  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 46 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Burnaby Mountain  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 53 ppb (3 year average)

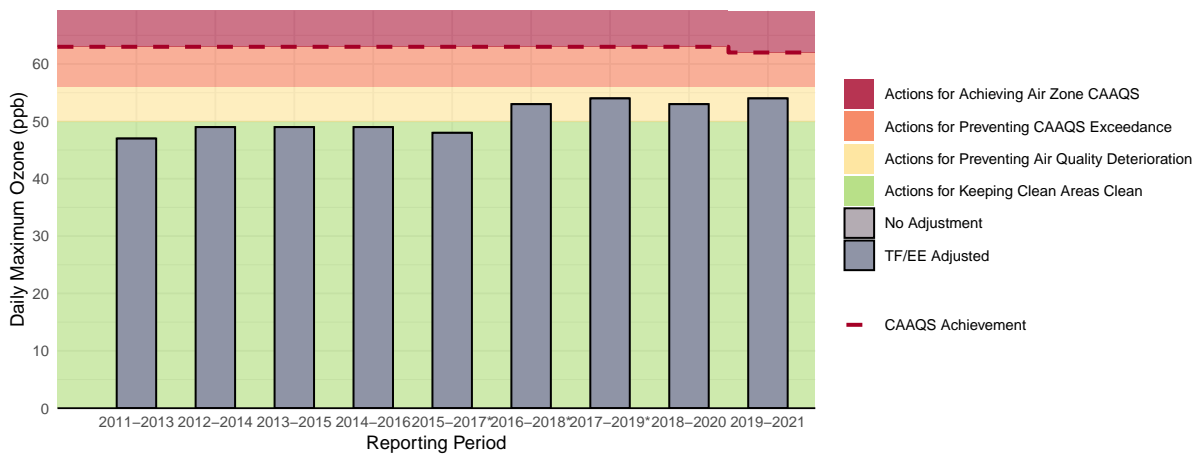

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Burnaby South  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 44 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Chilliwack Airport  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 57 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Coquitlam Douglas College  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 54 ppb (3 year average)

\* indicates only two of three years

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Hope Airport

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 56 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

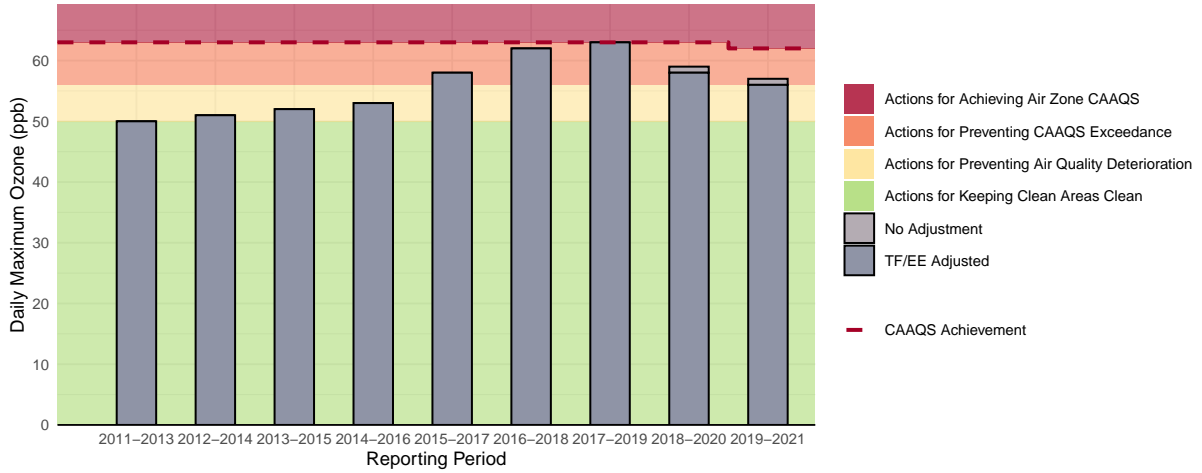

**Monitoring Station:** Langley Central

**Ozone Air Quality Standard:** Achieved

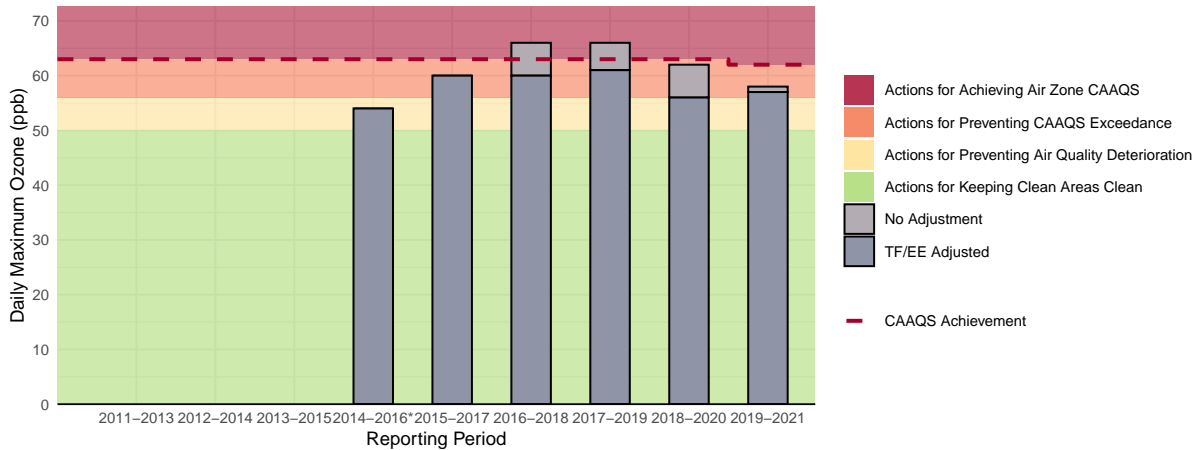

**Ozone Metric:** 52 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Maple Ridge Golden Ears School  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 57 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** Mission School Works Yard  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 58 ppb (3 year average)

\* indicates only two of three years

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** New Westminster Sapperton Park  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 47 ppb (3 year average)

\* indicates only two of three years

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** North Delta  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 45 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** North Vancouver Mahon Park  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 45 ppb (3 year average)

**Air Zone:** Lower Fraser Valley  
**Monitoring Station:** North Vancouver Second Narrows  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 38 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Pitt Meadows Meadowlands School

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 50 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Port Moody Rocky Point Park

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 48 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Richmond South

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 45 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Surrey East

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 50 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Tsawwassen

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 46 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Vancouver Clark Drive

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 41 ppb (3 year average)

\* indicates only two of three years

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Vancouver International Airport 2

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 44 ppb (3 year average)

**Air Zone:** Lower Fraser Valley

**Monitoring Station:** Vancouver Robson Square

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 38 ppb (3 year average)

\* indicates only two of three years

**Air Zone:** Northeast

**Monitoring Station:** Fort St John Key Learning Centre

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 50 ppb (2 year average)

**Air Zone:** Northeast

**Monitoring Station:** Taylor Townsite

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 51 ppb (3 year average)

**Air Zone:** Southern Interior  
**Monitoring Station:** Castlegar Zinio Park  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 52 ppb (3 year average)

**Air Zone:** Southern Interior  
**Monitoring Station:** Cranbrook Muriel Baxter  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 53 ppb (3 year average)

**Air Zone:** Southern Interior  
**Monitoring Station:** Kamloops Federal Building  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 51 ppb (3 year average)

**Air Zone:** Southern Interior  
**Monitoring Station:** Kelowna  
**Ozone Air Quality Standard:** Achieved  
**Ozone Metric:** 52 ppb (2 year average)

**Air Zone:** Southern Interior

**Monitoring Station:** Vernon Science Centre

**Ozone Air Quality Standard:** Achieved

**Ozone Metric:** 52 ppb (3 year average)
