NOTES		FLOODPLAIN DATA		LEGEND		KEY MAP		REVISIONS	
<p>Produced by: Acres International Limited 4th Floor, 845 Cambie St. Vancouver, BC V6C 2B2 (Dec, 1990)</p> <p>Survey: River Survey done by Surveys Section, Water Management Branch, Projects Sector - 4 (April, 1988 and Sept, 1988)</p> <p>Mapping: Base mapping done by Map Production Division, Surveys and Resource Mapping Branch, Projects Sector (Nov, 1989)</p> <p>Grid origin referred to UTM, Project 1980.</p>		<p>1. The floodplain areas as depicted on this map have been designated pursuant to the Canada/British Columbia Floodplain Mapping Agreement (1988) by the Minister of Environment for Canada and the Minister of Environment for British Columbia.</p> <p>Flooding may occur outside of the designated floodplain areas. The Ministers do not assume any liability by reason of the designation or failure to designate areas on this map.</p> <p>2. The Designated Flood has a statistical frequency of occurrence of once every 200 years.</p> <p>3. The flood levels were computed using a standard step method modelling technique, assuming open water flow conditions.</p> <p>4. The floodplain limits assume the absence of all dykes.</p> <p>5. The floodplain limits and flood levels include an allowance for freeboard.</p> <p>6. The floodplain limits are not established on the ground by legal survey.</p> <p>7. The floodplain limits are not delineated for side streams and tributaries.</p> <p>8. The required setback of buildings from the natural boundaries of lakes and watercourses to allow for the passage of floodwaters and possible bank erosion is not shown. This information is available either through local municipalities or the Ministry of Environment.</p> <p>9.
