

NOTES	FLOODPLAIN DATA	LEGEND	KEY MAP	REVISIONS	ISSUE OF MAPPING	ENVIRONMENT CANADA INLAND WATERS	BRITISH COLUMBIA MINISTRY OF ENVIRONMENT	CANADA BRITISH COLUMBIA FLOODPLAIN MAPPING AGREEMENT	FILE No.																					
<p>Produced by: British Columbia Water Management Branch, Special Projects Section, Floodplain Mapping Program.</p> <p>Survey: River survey done by Survey Section, Water Management Branch, Project 84PDC-2, 1984 and Project 88PDC-1, 1988 provincial and federal control based on provincial datum. © Indicates Survey Monument.</p> <p>Mapping: Base mapping done by Map Production Division, Survey and Resource Mapping Branch, Project 85-17, Air Photo Aug. 1983.</p> <p>a) Contour Interval 2 metre and greater; spot elevations shown to 0.1 metres with accuracy to ± 0.6 metres, except where noted.</p> <p>b) Grid origin referred to U.T.M. Projection Zone 10.</p>	<p>1. The floodplain areas as depicted on this map have been interim designated pursuant to the Canada/British Columbia Floodplain Mapping Agreement (1988) by the Minister of the Environment for Canada and the Minister of Environment for British Columbia.</p> <p>2. The designated Flood has a statistical frequency of occurrence of once every 200 years.</p> <p>3. The flood levels were computed using a standard step method modelling technique, assuming open water flow conditions.</p> <p>4. The floodplain limits assume the absence of all dikes.</p> <p>5. The floodplain limits and flood levels include an allowance for freeboards.</p> <p>6. The floodplain limits are not established on the ground by legal survey.</p> <p>7. The floodplain limits are not delineated for side streams and tributaries.</p> <p>8. The required setback of buildings from the natural boundaries of lakes and watercourses to allow for the passage of floodwaters and possible bank erosion is not shown. This information is available either through local municipalities or the Ministry of Environment.</p> <p>9.
