

Province of British Columbia

Water Act

CONDITIONAL WATER LICENCE

The Ministry of Forests, Lands and Natural Resource Operations, as represented by the Range Program is hereby authorized to divert and use water as follows:

- a) The source on which the rights are granted is West Pavilion Springs.
- b) The point of diversion is located as shown on the attached plan.
- c) The date from which this licence shall have precedence is July 24, 2014.
- d) The purpose for which this licence is issued is stockwatering.
- e) The maximum quantity of water which may be diverted is 3.03 cubic metres per day.
- f) The period of the year during which the water may be used is April 1 to May 31.
- g) The land upon which the water is to be used and to which this licence is appurtenant is the stockwatering project of the licensee within the unsurveyed Crown land appurtenant to RAN077734.
- h) The authorized works are a diversion structure, pipe, tank, trough, and float valve which shall be located approximately as shown on the attached plan.
- i) The construction of the said works shall be completed and the water shall be beneficially used prior to December 31, 2016. Thereafter, the licensee shall continue to make regular beneficial use of the water in the manner authorized herein.
- j) This licence is issued under the *Water Act* (the Act). The exercise of rights under the licence is subject to the Act and its regulations, the terms and conditions of the licence, orders under the Act and the rights of licensees whose rights have precedence on the stream. The licensee must comply with all such requirements, as well as the provisions of all other applicable enactments. In exercising rights under the licence, the licensee must exercise reasonable care to avoid damaging land, works, trees or other property, and must make full compensation to the owners for damage or loss resulting from construction, maintenance, use, operation or failure of the works.

- k) The industrial stockwatering purpose authorized by this licence is for use outside the wetted perimeter of the source in a trough located approximately as shown on the attached plan.
